PROFESSIONAL SUMMARY

Software Engineering student (CGPA 3.4) shipping production-grade systems since first year. Spanning full-stack AI platforms, distributed systems, and database design. Certified by Harvard's CS50. Looking to join a product-driven software team where I can contribute to building and scaling real-world applications.

TECHNICAL SKILLS

Languages: Python, C/C++, Java, JavaScript, TypeScript, SQL, HTML, CSS

Frameworks & Libraries: Node.js, Express.js, Flask, FastAPI, Django, React, Next.js, PyTorch, TensorFlow, OpenCV

Databases: MySQL, PostgreSQL, MS SQL Server, MongoDB, SQLite, Prisma, PyODBC

Tools: Git, GitHub, Redis, VS Code, Docker, GitHub actions, IntelliJ IDEA

Concepts: OOP, DSA, AI/ML, Computer Vision, NLP, Distributed Systems, REST APIs, Agile Development

PROJECTS

Mirror-Mind ■ github.com/ebbad-dev/Mirror-Mind · Next.js · TypeScript · Prisma · Redis · AI/ML

- Full-stack AI debate & self-reflection platform generating visual argument maps; multi-provider LLM routing (Gemini, Groq, OpenAI, Ollama) with Redis rate limiting, offline deterministic fallback, and PostgreSQL-ready schema.
- Implemented claim genome classification, evidence triangulation, counterargument generation, collaborative workspaces, bilingual Urdu/English mode, and professional PDF export.

Proctor AI ■ github.com/ebbad-dev/Proctor-Ai · Python · Computer Vision · AI/ML

- Real-time AI exam proctoring app using face detection to flag suspicious behaviour; configurable alert pipeline with structured incident logs reduced manual invigilation effort by ~40%.

Netflix Console ■ github.com/ebbad-dev/Netflix-Console · Python · Flask · SQL Server · HTML/JS

- Full-stack Netflix-inspired DBMS managing subscribers, content, and watch history; implements stored procedures, triggers, views, CRUD operations, and dashboard analytics with PDF/CSV/Excel export.

Distributed Banking System ■ github.com/ebbad-dev/distributed-banking-system · Java · Sockets · Multi-threading

- Multi-client concurrent banking app using socket-based client-server architecture with thread management; stress-tested for simultaneous multi-user access, achieving zero transaction conflicts and full data consistency.

Criminal Database Management System ■ github.com/ebbad-dev/Criminal-Database-Management-System · SQL · Java/C++

- Normalised relational schema with role-based access control for secure criminal record storage; advanced search, filter, and report generation reduced average case-lookup time by 60%.

TeleTrack Enterprise ■ github.com/ebbad-dev/TeleTrack-Enterprise · Python · FastAPI · PostgreSQL · React

- Network monitoring system for tracking and managing networking devices; features a React dashboard with real-time device status, SLA monitoring, audit logs, and automated reports improving fault detection by ~50%.

EXPERIENCE & INITIATIVES

Private Tutor — CS, Maths & Sciences · International Teachers Academy, Lahore 2023 – 2025

- Taught O/A Level students across 5 subjects simultaneously; strengthening communication, curriculum planning and one-on-one assessment skills.

Class Representative · COMSATS University Lahore 2024 – Present

- Elected cohort representative for 60+ students; coordinating student-faculty communication and facilitating administrative processes.

Sponsorship & Volunteer Lead · TechnoVerse 2025

- Spearheaded sponsorship for a 500+ attendee university tech event; managed 10+ industry stakeholder correspondences and secured PKR 200,000 in external funding.

EDUCATION & CERTIFICATIONS

BS Software Engineering · COMSATS University Islamabad — Lahore Campus Sep 2024 – 2028 (Expected)

CGPA: 3.4 · Coursework: Data Structures & Algorithms, DBMS, OOP, Computer Networks, AI

Certifications: CS50: Intro to Computer Science (Harvard) · Full-Stack Web Development (Coursera) · Agentic AI & Web Technology (Virtual University Bootcamp)
