

EBBAD UR REHMAN

Software Engineering Student | Full-Stack Developer | AI / ML | Databases | Systems
ebbadurrehman538@gmail.com | 0302 1846044 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Software Engineering student with hands-on experience building full-stack, AI-assisted, and database-driven systems using Python, JavaScript/TypeScript, Node.js, React, SQL, and modern backend workflows. Strong foundation in DSA, OOP, DBMS, APIs, computer vision, and system design, with Harvard CS50 certification and a project portfolio focused on practical engineering problems.

TECHNICAL SKILLS

Languages: Python, C/C++, Java, JavaScript, TypeScript, SQL, HTML, CSS
Frameworks & Libraries: Node.js, Express.js, Flask, FastAPI, Django, React, Next.js, PyTorch, TensorFlow, OpenCV
Databases: MySQL, PostgreSQL, MSSQL Server, MongoDB, SQLite, Prisma, PyODBC
Tools: Git, GitHub, Redis, VS Code, Docker, GitHub Actions, IntelliJ IDEA, Postman, Vercel
Concepts: OOP, DSA, AI/ML, Computer Vision, NLP, Distributed Systems, REST APIs, Agile Development

PROJECTS

- MirrorMind - Next.js, TypeScript, Prisma, Redis, AI/ML** [GitHub](#)
- Built a debate and self-reflection platform that converts opinions into argument maps, assumptions, evidence gaps, and counterarguments.
 - Implemented LLM routing concepts, deterministic fallback behavior, bilingual mode, collaborative workspaces, and PDF export workflows.
- ProctorAI - Python, Computer Vision, AI/ML** [GitHub](#)
- Developed an exam monitoring prototype with webcam analysis, face detection, configurable risk scoring, evidence review, and instructor reporting flows.
- TeleTrack Enterprise - Python, FastAPI, PostgreSQL, React** [GitHub](#)
- Designed a network operations system for devices, technicians, facilities, alerts, incidents, audit logs, SLA tracking, and uptime-style reporting.
- Student Result Management API - Node.js, Express.js, MongoDB** [GitHub](#)
- Created a backend API for student records, subjects, result entries, validation, role-aware routes, and maintainable academic CRUD workflows.
- Distributed Banking System - Java, Sockets, Multi-threading** [GitHub](#)
- Implemented a multi-client banking simulation with socket-based client-server architecture, thread management, and consistency-focused transaction handling.
- Netflix Console DBMS - Python, Flask, SQL Server, HTML/JS** [GitHub](#)
- Modeled a Netflix-inspired database system for subscribers, content, and watch history with CRUD workflows, stored procedures, triggers, views, and reporting exports.

EXPERIENCE & INITIATIVES

- Private Tutor - CS, Maths & Sciences - International Teachers Academy, Lahore | 2023-2025**
- Taught O/A Level students across five subjects, strengthening communication, curriculum planning, and one-on-one assessment skills.
- Class Representative - COMSATS University Lahore | 2024-Present**
- Represent 60+ students by coordinating student-faculty communication and supporting administrative processes.
- Sponsorship & Volunteer Lead - TechnoVerse 2025 | 2025**
- Supported sponsorship outreach for a 500+ attendee university tech event through stakeholder communication and event coordination.

EDUCATION & CERTIFICATIONS

BS Software Engineering - COMSATS University Islamabad, Lahore Campus | Sep 2024-2028 (Expected) | CGPA: 3.4
Coursework: Data Structures & Algorithms, DBMS, OOP, Computer Networks, AI
Certifications: CS50: Intro to Computer Science (Harvard); Full-Stack Web Development (Coursera); Agentic AI & Web Technology (Virtual University Bootcamp)
