PROFESSIONAL SUMMARY

Software Engineering student at COMSATS University Islamabad, Lahore Campus (CGPA 3.4), building production-style portfolio systems across full-stack development, AI/ML, computer vision, distributed systems, and database design. Harvard CS50 certified and seeking a product-driven software team where I can contribute to reliable backend APIs, clear interfaces, and practical engineering workflows.

TECHNICAL SKILLS

Languages: Python, C/C++, Java, JavaScript, TypeScript, SQL, HTML, CSS

Frameworks & Libraries: Node.js, Express.js, Flask, FastAPI, Django, React, Next.js, PyTorch, TensorFlow, OpenCV

Databases: MySQL, PostgreSQL, MS SQL Server, MongoDB, SQLite, Prisma, PyODBC

Tools: Git, GitHub, Redis, VS Code, Docker, GitHub Actions, IntelliJ IDEA, Postman, Vercel

Concepts: OOP, DSA, AI/ML, Computer Vision, NLP, Distributed Systems, REST APIs, Agile Development

PROJECTS

MirrorMind | Next.js, TypeScript, Prisma, Redis, AI/ML | github.com/ebbad-dev/Mirror-Mind

- Full-stack debate and self-reflection platform that turns opinions into visual argument maps, assumptions, evidence gaps, and counterarguments using multi-provider LLM routing and deterministic fallback behavior.
- Built claim classification, evidence triangulation, collaborative workspaces, bilingual Urdu/English mode, and professional PDF export workflows.

ProctorAI | Python, Computer Vision, AI/ML | github.com/ebbad-dev/Proctor-Ai

- AI exam monitoring prototype using webcam analysis, face detection, configurable risk scoring, structured incident logs, evidence review, and instructor-facing reporting flows.

TeleTrack Enterprise | Python, FastAPI, PostgreSQL, React | github.com/ebbad-dev/TeleTrack-Enterprise

- Network operations project for managing devices, technicians, facilities, alerts, incidents, audit logs, SLA tracking, and uptime-style reporting through a dashboard workflow.

Student Result Management API | Node.js, Express.js, MongoDB | github.com/ebbad-dev/STUDENT-RESULT-MANAGEMENT-API

- Backend API for student records, subjects, result entries, validation, role-aware routes, and clean CRUD workflows designed for maintainable academic data management.

Distributed Banking System | Java, Sockets, Multi-threading | github.com/ebbad-dev/distributed-banking-system

- Multi-client banking simulation with socket-based client-server architecture, thread management, transaction handling, and consistency-focused concurrency controls.

Netflix Console / DBMS | Python, Flask, SQL Server, HTML/JS | github.com/ebbad-dev/Netflix-Console

- Netflix-inspired database system managing subscribers, content, and watch history with CRUD operations, stored procedures, triggers, views, and export-oriented reporting.

EXPERIENCE & INITIATIVES

Private Tutor - CS, Maths & Sciences | International Teachers Academy, Lahore | 2023 - 2025

- Taught O/A Level students across five subjects, strengthening communication, curriculum planning, and one-on-one assessment skills.

Class Representative | COMSATS University Lahore | 2024 - Present

- Elected cohort representative for 60+ students, coordinating student-faculty communication and administrative processes.

Sponsorship & Volunteer Lead | TechnoVerse | 2025

- Supported sponsorship outreach for a 500+ attendee university tech event, managing stakeholder correspondence and event coordination responsibilities.

EDUCATION & CERTIFICATIONS

BS Software Engineering | COMSATS University Islamabad - Lahore Campus | Sep 2024 - 2028 (Expected)

CGPA: 3.4 | Coursework: Data Structures & Algorithms, DBMS, OOP, Computer Networks, AI

Certifications: CS50: Intro to Computer Science (Harvard) | Full-Stack Web Development (Coursera) | Agentic AI & Web Technology (Virtual University Bootcamp)
